

Dear Friend

We now know that Senate Democrats intend to pass a bill with many of the Biden Administration's proposals to address social injustice and the climate crisis through the process of budget reconciliation. The budget framework that the Senate approved 50 to 49 includes a 100% Clean Electricity Standard and a Clean Energy and Sustainability Accelerator. But some senators have already said that changes are needed if they are to vote for it.

**We urge all Friends to contact your senators and representatives. Please ask them to insist that both the 100% Clean Electricity Standard and the Clean Energy and Sustainability Accelerator are included in the reconciliation bill they pass this fall. Please see the attached memo for an explanation of our request and sources of more information.**

With gratitude, the Eco-Justice Collaborative of Philadelphia Yearly Meeting

Please note:

- FCNL is now actively supporting the Clean Energy Standard. Sign up for "Inside the Greenhouse," its bi-weekly update, at <https://act.fcnl.org/signup/sign-environment-energy-alerts/?source=greenhouse>.
- We think the Eco-Justice Collaborative is the only project informing Friends about the Clean Energy Accelerator. If you know others who might contact their senators and representative, please send this to them.
